

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

1. Submission details

1.1 Date

For example, 3/11/2023

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

☒ Yes (PEA survey date 22.01.2025)

☐ No

4.2 If no, what earlier date did you agree with the LPA?

4.3 How have you met the guidance on 'what counts towards your BNG'?

[Find out what you can count towards a development's BNG](#)

The baseline habitat comprises hardstanding (no value), modified grassland, ruderal/ ephemeral and urban trees. The post development habitat value for the site comprises hardstanding and unsealed surfaces (no value), vegetated garden, and urban trees.

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

There are no irreplaceable habitats on-site.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☒ Yes

☐ No

4.6 How will you achieve the target net gain percentage?

☐ On-site

☐ Off-site

☒ Both

4.7 Are any of your on-site enhancements considered 'significant'?

[Find out what counts as a significant on-site enhancement.](#)

☐ Yes

☐ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

We are retaining the large tree on-site and planting ten new trees.

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

0.26

4.10 Explain why you're using off-site biodiversity units

Only answer this question if you're planning to use off-site biodiversity units (250 words).

Due to the constrained nature of the site and the dominance of built development and private amenity space, there is limited scope to deliver additional habitat creation or enhancement on-site or within land under the applicant's control. Private gardens and amenity grassland cannot be enhanced beyond low distinctiveness and are therefore insufficient to offset the identified deficit. As such, the delivery of biodiversity net gain will require off-site compensation.

4.11 Explain why you're planning to use statutory biodiversity credits

Only answer this question if you're planning to use statutory biodiversity credits (250 words).
