Prior notification of proposed demolition of Calder Hall Turbine Hall B

Thank you for the above planning consultation.

There are no objections to this proposal from Environmental Health as the works are unlikely to impact on local residential amenity or significantly affect local air quality.
If mobile crusher / screener plant is brought on to the site, however, notification should be provided to the Environmental Health team.
Given the industrial history of the building, and its past contents, planners may wish to consider if a condition for unexpected contamination is required.

Regards

Environmental Health
