Listed building consent for temporary ground investigation works to the north wall of the harbour

Thank you for the submission of the Draft Construction Environmental Management Plan (CEMP) following the comments from the Ecology team on 12.08.26. Environmental Health are happy with the document. We would add that the site staff should be aware of the ongoing issues around Avian Influenza. There are no known outbreaks currently in our area but sea birds may become affected and we have experienced gull carcasses around the harbour in the past. Further information on Avian Influenza can be found online at – [Bird flu \(avian influenza\): latest situation in England - GOV.UK](#)

Regards
