Subject: RE: Planning Application 4/26/2224/0F1

Hi Sarah,

I have reviewed the design drawings again and am satisfied with our previous assessment and conclusion that 'one-way traffic flow plates will be installed to control vehicle movements, permitting inward access only. Vehicle egress will continue to be via the Lake View lane, as existing' Vehicle access plates make it impossible to drive over them the wrong direction, so no egress can be made at the entrance.

Does that clear things up?

Plan showing proposed
direction of travel

Scale 1:500

Regards

Shamus Giles
