

CUMBERLAND COUNCIL
CONSULTATION RESPONSE

Proposal: Discharge of condition 3 of planning application 4/22/2412/0F1

Address: Reading Room, Sellafield Road, Beckermets

Reference: 4/24/2428/DOC

Date: 20/01/25

Description: Beckermets Reading Room is a small but handsome non-designated heritage asset dating from the early 20th century. It is located within a leafy and mainly residential part of the conservation area

Conclusion: No objection

Assessment:

A photo material sample has been provided for the external paving. This is an attractive natural sandstone, with an attractive pale brown or buff colour. This should provide a lasting and attractive surface, from which I anticipate benefit to the appearance of the conservation area.

Relevant Policies and Guidance:

Section 72 of the 1990 Act states that “special attention shall be paid to the desirability of preserving or enhancing the character or appearance of [a conservation] area.”

NPPF para. 205 states, in the case of designated heritage assets, “great weight should be given to the asset’s conservation”, irrespective of whether potential harm is substantial, less-than-substantial, or total loss. Where harm to a designated heritage asset is less-than-substantial, it should be weighed against the public benefits of the proposal (para. 208).

Paragraph 209 of the National Planning Policy Framework (NPPF) states the effect on the significance of a non-designated heritage asset should be taken into account when making decisions.

Opportunities should be sought for new development within conservation areas and the settings of heritage assets that enhances or better reveals their significance. (para. 212)

Referring to assets in a conservation area, NPPF para. 213 states that loss of an element that makes a positive contribution to a conservation area should be treated as either substantial (under para. 206-7) or less-than-substantial harm (under paragraph 208).

The Copeland area’s Local Plan contains a number of relevant policies:

- BE1 provides for the preservation and enhancement of built heritage assets by:
 - Requiring a heritage impact assessment or heritage statement where the proposal would affect a heritage asset;
 - Giving great weight to the conservation of Copeland’s designated heritage assets when decision making;

- Ensuring that new development is sympathetic to local character and history;
 - Supporting proposals for the appropriate reuse of vacant historic buildings, recognising that putting buildings into viable uses consistent with their conservation can help sustain and enhance their significance;
 - Supporting proposals that increase the enhancement, promotion and interpretation of Copeland's architectural and archaeological resources;
 - Strengthening the distinctive character of Copeland's settlements, through the application of high-quality design and architecture that respects this character and enhances the setting of heritage assets.
- BE2 states that development should preserve or enhance designated heritage assets (or important archaeological sites) and their settings. The more important the asset, the greater weight that will be given to its conservation. Proposals that better reveal the significance of heritage assets will be supported in principle. Any harm to, or loss of, the significance of a designated heritage asset will require clear and convincing justification.
 - BE4 refers to non-designated heritage assets, saying that development should preserve or enhance such heritage assets and their settings. Proposals that better reveal the significance of heritage assets will be supported in principle. Proposals affecting non-designated heritage assets or their settings should demonstrate that consideration has been given to their significance.
 - DS4 outlines the Council's expectation that all new development will meet high-quality design standards that contribute positively to the health and well-being of residents.
 - DS5 refers to the importance of achieving good standards of design in both hard and soft landscaping.

The Conservation Area Design Guide is a supplementary planning document adopted in 2017 that is a material consideration in the determination of planning applications within conservation areas in the legacy Copeland area. It is therefore applicable to this application.

Sammy Woodford

Conservation and Design Officer
