

**CUMBERLAND COUNCIL
CONSULTATION RESPONSE**

Proposal: Internal remodelling of office space

Address: Catherine Mill, Catherine Street, Whitehaven

Reference: 4/25/2268/OL1

Date: 12/08/25

Description: Catherine Mill is a grade II* listed former fireproof flax mill. It dates from the early 19th century, and has also variously been used as a warehouse. It fell out of use in the 20th century, before being converted into flats.

Conclusion: No objection

Assessment:

- The proposal consists of minor alterations to modern features inserted when the building was converted to flats.
- They will not entail any impact on the significance of the building.

Relevant Policies and Guidance:

The Planning (Listed Buildings and Conservation Areas) Act 1990 establishes a need “in considering whether to grant listed building consent for any works [for the Local Planning Authority to] have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest” [Section 16(2)].

NPPF para. 210 states that “In determining applications, local planning authorities should take account of the desirability of sustaining and enhancing the significance of heritage assets and putting them to viable uses consistent with their conservation...”

NPPF para. 212 states, in the case of designated heritage assets, “great weight should be given to the asset’s conservation”, irrespective of whether potential harm is substantial, less-than-substantial, or total loss. Where harm to a designated heritage asset is less-than-substantial, it should be weighed against the public benefits of the proposal (para. 215).

The Copeland area’s Local Plan contains a number of relevant policies:

- BE1 provides for the preservation and enhancement of built heritage assets by:
 - Requiring a heritage impact assessment or heritage statement where the proposal would affect a heritage asset;
 - Giving great weight to the conservation of Copeland’s designated heritage assets when decision making;
 - Ensuring that new development is sympathetic to local character and history;
 - Supporting proposals for the appropriate reuse of vacant historic buildings, recognising that putting buildings into viable uses consistent with their conservation can help sustain and enhance their significance;

- Supporting proposals that increase the enhancement, promotion and interpretation of Copeland's architectural and archaeological resources;
 - Strengthening the distinctive character of Copeland's settlements, through the application of high-quality design and architecture that respects this character and enhances the setting of heritage assets.
- BE2 states that development should preserve or enhance designated heritage assets (or important archaeological sites) and their settings. The more important the asset, the greater weight that will be given to its conservation. Proposals that better reveal the significance of heritage assets will be supported in principle. Any harm to, or loss of, the significance of a designated heritage asset will require clear and convincing justification.
