

**CUMBERLAND COUNCIL
CONSULTATION RESPONSE**

Proposal: Discharge or conditions 5 and 6 on 4/21/2364/OL1

Address: Levels, 6-8 Lowther Street, Whitehaven

Reference: 4/25/2260/DOC and 4/25/2267/DOC

Date: 12/08/25

Description: 6-8 Duke Street, now known as Levels, formerly known as Whittle's, and before that as Davis's Chusan Tea Warehouse, is a late 19th century building with somewhat Italianate styling elements. It is listed grade II and is within Whitehaven's conservation area.

Conclusion: No objection

Assessment:

- The condition requires approval of "full details and specification of the PV panels that are to be installed on the roof" prior to their installation.
- The PV array consists of 12no. 1200x1800mm panels mounted on the flat roof in front of the access door from the third floor. A 50mm stone ballast will be provided for fire protection of the roof membrane.
- The array will not be visible from the surroundings, or from within the building, and will be visible only when standing on the roof among the other building plant. The impact is therefore negligible on the building's significance, and there is no impact on the character and appearance of the conservation area. Justification is provided in providing a renewable on site energy source.

Relevant Policies and Guidance:

The Planning (Listed Buildings and Conservation Areas) Act 1990 establishes a need "in considering whether to grant listed building consent for any works [for the Local Planning Authority to] have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest" [Section 16(2)]. This requirement also applies to the granting of planning permission affecting a listing building or its setting [Section 66(1)].

Section 72 of the 1990 Act states that "special attention shall be paid to the desirability of preserving or enhancing the character or appearance of [a conservation] area."

Paragraph 134 of the National Planning Policy Framework (NPPF) asserts that "Development that is not well designed should be refused".

NPPF para. 197 states that “In determining applications, local planning authorities should take account of the desirability of sustaining and enhancing the significance of heritage assets and putting them to viable uses consistent with their conservation...”

NPPF para. 199 states, in the case of designated heritage assets, “great weight should be given to the asset’s conservation”, irrespective of whether potential harm is substantial, less-than-substantial, or total loss. Where harm to a designated heritage asset is less-than-substantial, it should be weighed against the public benefits of the proposal (para. 202).

Opportunities should be sought for new development within conservation areas and the settings of heritage assets that enhances or better reveals their significance. (para. 206)

Referring to assets in a conservation area, NPPF para. 207 states that loss of an element that makes a positive contribution to a conservation area should be treated as either substantial (under para. 201) or less-than-substantial harm (under paragraph 202).

The former Copeland Borough Council’s Local Plan contains a number of relevant policies:

- Local Plan Policy ST1C(ii) highlights the importance of protecting, enhancing and restoring the Borough’s cultural and heritage features and their settings.
- ST1D emphasises the council’s commitment to creating and retaining quality places.
- ENV4A stresses the importance of protecting listed buildings, conservation areas and other features considered to be of historic, archaeological or cultural value.
- ENV4B outlines support for heritage-led regeneration, ensuring assets are put to appropriate, viable and sustainable uses.
- ENV4C aims to strengthen the distinctive character of settlements through high quality urban design and architecture that respect character and setting.
- DM10 emphasises the need for high quality design and quality places. Part B requires design to respond to local character at multiple scales, paying attention to plot size and arrangement, massing and scale, interstitial spaces, and materials. Part C requires the incorporation of existing features such as landscape and vernacular style.
- DM27A outlines support in principle for developments that “protect, conserve and where possible enhance the historic, cultural and architectural character of the borough’s historic sites and their settings”.
- DM27C outlines the restriction in principle of development within conservation areas to that which preserves or enhances the character or appearance of the area.
- DM27D highlights the necessity of avoiding disrespectful alterations, substantial demolition, adverse effects on setting or views, or changes of use that harm the conservation or economic viability of a listed building.

The Conservation Area Design Guide is a supplementary planning document adopted in 2017 that is a material consideration in the determination of planning applications within conservation areas in the legacy Copeland area. It is therefore applicable to this application.

Sammy Woodford, Conservation and Design Officer
