

Hardworks

Main Entrance Drive and Communal Drive Areas
Bitmac apron to be in with existing road surface. Exposed aggregate drive surface to be Supercolour® Exposed in Travel or similar to be approved.
Reclaimed gritstone set kerbs, 70mm upstand, joints to be as narrow as possible - no mortar visible.

Private Driveways and Parking Areas
Proposed Tarmac by Tarmac in 'Cedar or Silver' sett infill with matching bricks/banding, or similar to be approved. Kerbs to match.

Self Threshold
Bands of reclaimed gritstone setts, laid flush with adjacent surfacing.
Mortar joints to be as narrow as possible.

Proposed Paths, Patios and Steps
All to be surfaced with buff, natural stone flags and edged with matching natural stone setts where appropriate. Joint panels of square flags in same material within patios laid to add interest. Slipping stones if used in same material.

Proposed Garden Walls
Brick walls and piers with stone copings. Brick to be specified by the architect. Stone cope 75mm depth to match building gable. Piers to be 2 brick courses above wall height. Retaining walls to be 150mm above upper soil level, walls to be finished with hedging or shrub planting where possible.

Proposed Walls and Piers along Roadside
Red sandstone wall of local vernacular with piers to match, max 2m high, retaining walls to be 150mm above upper soil level.

High Timber Fence
1.8m high timber fence to form property divides. Vertical feather edge, close boarded with capping rail. Fence to slope with natural ground gradients - no stepping. Fence to be stained very dark brown. Timber gates to match. Fences to steps down to 1.1m high where possible, e.g. when on top of retaining wall and towards the rear of rear gardens.

Timber Post and Stock Proof Fence
1.1m high round banded timber posts with stock proof wire netting.

Softworks

Proposed Trees
Trees selected for seasonal variety, interest and form and tolerant of local conditions, trees to be selected from the palette below. Nearby trees have been viewed to assess which species and varieties are most likely to tolerate the hillside location. All trees to be double staked and of local provenance.
AC - Acer campestre 'Elegant', 16-18cm girth, RB
AP - Acer platanoides, 16-18cm girth, RB
AL - Amelanchier lamarckii (multi-stem), 2.5m high, CG
BF - Betula 'Fascination', 16-18cm girth, RB
BP - Betula pendula, 16-18cm girth, RB
CP - Crataegus punctulata, 16-18cm girth, RB
OS - Ostrya laevis 'Sorbent', 16-18cm girth, RB
MF - Malus floribunda, 16-18cm girth, RB
PP - Prunus padus, 16-18cm girth, RB
PS - Pinus sylvestris, 2.2-2.5m high, RB
QP - Quercus pedunculata, 20-25cm girth, RB
QR - Quercus robur, 16-18cm girth, RB
SE - Sorbus aria, 16-18cm girth, RB
SA - Sorbus aucuparia, 16-18cm girth, RB

Proposed Hedges
All hedges to be Crataegus laevis (unless annotated as Native Species).
Hedges due to the exposed, coastal location.
1m high, 3 per linear metre planted in a single line. CG

Proposed Low Hedging
Ilex cornuta 'Green Glory', 30-40cm high, planted at a rate of 5 per 1m metre in a single row, clipped after planting to form an instant hedge.

Proposed Shrub Planting
Range of plants selected for seasonal variety, colour and form. See schedule for typical species, sizes and densities.

Proposed Lawn

Proposed Levels
P120.00
E121.00

Visibility displays

PLANTING NOTES

This landscaping plan shall be implemented in full accordance with the approved scheme within the first planting season following the occupation of the buildings or completion of the approved development, whichever is the sooner, or in accordance with a programme first agreed in writing with the Local Planning Authority. Any trees, shrubs or hedging plants in accordance with this condition which are removed, die, become severely damaged or become seriously diseased within five years of planting shall be replaced within the next planting season by trees, shrubs or hedging plants of similar size and species to those originally required to be planted.

Do not substitute species, variety and form or reduce the specified size and number of plants without prior agreement. Note sizes shown are minimum.

Topsoil to be premium grade topsoil to BS 3882 (most recent). Topsoil depth to be minimum of 450mm in shrub borders + 150mm in lawned areas.

All planting to be watered as required immediately after planting. We advise all evergreen hedges and semi-mature trees are linked to a leaky pipe watering system.

All plants to be free from pests and disease. All plants to be good specimens and characteristic of the species. Do not plant anything in the rain shadow under a roof overhang.

Allow for the preparation of tree pits for new trees. Pits to be adequate in size to take tree rootballs. Pits to be backfilled with 20% clean stone as drainage layer and 80% clean topsoil.

Semi mature and Extra Heavy Standard trees to be secured by underground guying. Selected Standards to be secured with a single timber round stake with appropriate rubber tie. All trees and hedges to be checked periodically to check stakes are sufficient to keep plants and trees upright.

At completion carefully spread PAS100 composted green waste to an even and uniform depth of 50mm at all planted areas, including hedges.

All trees, hedging, shrubs and plants to comply with BS 3936 (most recent) specification for nursery stock.

All site preparation, planting and maintenance to comply with BS 4429 (most recent).

All new trees to be positioned in accordance with requirements of table 2 BS 5837 (most recent)

All new turf to be fine quality from London or equivalent and laid in accordance with BS 3969 (most recent).

LEAF COLLECTION IN YEAR 1 AND 2
It will be important to ensure that the bulk of leaf litter is collected during the first two Autumn periods after ground flora establishment as the grass will not be strong enough to resist the smothering effect of leaf cover.

WATERING AND MAINTENANCE
All the newly planted stock shall be watered during dry spells.

GRASS CARE
Grass shall be treated with 2 no spring and summer feeds and one autumn feed.

TREE INSPECTIONS
The trees should be inspected for disease and decay by a qualified arboriculturalist every 5 years.

Schedule of Typical Shrub Species: Plant in single species groups of 2, 3 and 5				
Shrub Species	Code	Size in cm	C Size	Density/Spacing
Azalea deciduous	AZA DEC	40-60	C10	2No per m²
Azalea japonica	AZA JAP	30-40	C10	3No per m²
Choysya ternata 'Sundance'	CHO SUN	40-60	C10	3No per m²
Cornus 'Elegantissima'	COR ELE	80-100	C10	2No per m²
Eucornia 'Silver Queen'	EUC SIL	30-40	C10	3No per m²
Hebe 'Margerie'	HEB MAR	40-60	C10	3No per m²
Hydrangea macrophylla 'Lanarth White'	HYD WHI	60-80	C10	2No per m²
Lavandula 'Hidote'	LAV HID	30-40	C10	3No per m²
Lonchocarpus 'May Green'	LON MAY	40-60	C10	3No per m²
Philomela fruticosa	PHL FRU	40-60	C10	3No per m²
Photinia 'Red Robin'	PHO RED	40-60	C10	2No per m²
Rhododendron 'Yakushima'	RHO HYB	40-60	C10	3No per m²
