The following NFR serves as an addendum to the Phase 1 Habitat Survey (RP/3509968/CSA/00015/A) which was produced on 3rd April 2018 and validated in August 2019.

A further site walk down was carried on 12th March 2021 to validate that the Phase 1 habitat Survey remained relevant.

We confirm that the previous ecology report is still valid as there have been no significant changes to the site since the initial report was undertaken. The future changes to the site as part of the development will further reduce the risks from a wildlife perspective rather than increase them.
